

GOLD SPONSORS

QBD

BOOTH 63

Quality by Design (QbD) helps organizations in the life sciences, healthcare and cosmetics industry to qualitatively develop and produce products, by keeping risks under control.

We offer a variety of services for the development and optimization of your processes ranging from the development until distribution of your product/therapy.

QbD has developed two in-house methodologies: smartQbD is a lean approach in the implementation of QbD principles as mentioned in ICH Q8; the Technology transfer framework provides a guideline in the efficient transfer of products and processes across companies. Together with Antleron, QbD has gained specific knowledge to automate your advanced therapies. QbD has offices in Belgium, the Netherlands, Spain and Mexico and has about 150 employees.

SILVER SPONSOR

ALTRAN

BOOTH 64

As the global leader in Engineering and R&D services (ER&D), Altran offers its clients a new way to innovate by developing the products and services of tomorrow. Altran works alongside its clients on every link in the value chain of their project, from conception to industrialization. For over thirty years, the Group has provided its expertise to key players in the Aerospace, Automotive, Defence, Energy, Finance, Life Sciences, Railway, and Telecoms sectors, among others. We are dedicated to supplying effective and adaptable solutions that boost the value of companies. Our approach combines critical technologies, multi-domain expertise and cross-fertilization between sectors. Based on a global network of world-class experts and a cost-cutting industrial supply chain, our customized tools deliver business goals in an ever more challenging environment. In 2017, the Altran group generated revenues of €2.828bn. With a headcount of more than 33,000 employees, Altran is present in more than 20 countries. In Belgium and Luxembourg, Altran employs about 800 people with its main office in Brussels.

Research Building and Bio Accelerator VZW Loocus (VIB & UGent) & Obelisc NV, Ghent

Research building Capture (UGent), Eiland Zwijnaarde

www.svr-architects.eu

SVR-ARCHITECTS nv was established in 1972 and provides design services for a wide variety of sectors.

With a team of 30 employees we provide new build and remodelling projects with **thought leadership** in health care and laboratory design. Our laboratory services range from **laboratory programming** to detailed **laboratory design**, supporting our clients in all phases of delivering an inspirational and efficient research environment.

Our expertise:

We design **laboratories for industry** (life sciences, pharma, consumer goods, construction materials,...), **universities** and **government departments** as well as other **special facilities** such as pilot plants, storage facilities, animal housing facilities, environmentally - controlled rooms, clean rooms, cGMP environments, waste rooms, labs for sophisticated equipment, lab media distribution systems and many others.

With the successful completion of the BIOSCAPE project we are celebrating a fantastic new reference to our extensive portfolio of research facilities. The BIOSCAPE life science campus is a truly unique project in its kind. Today we are designing several new research facilities for the University of Ghent and the VIB (Flemish institute for biotechnology) as well as a new accelerator lab for Obelisc to welcome growing biotech firms. All of these projects are located in the south of Ghent. In the port of Antwerp the design of a new QC lab for BASF is in full development and our office is also awarded with the design of a new innovation center for Procter&Gamble in UK and Brazil where construction works will start soon.
